### About Penny Auctions

Penny Auctions are a new concept in entertainment shopping in which there is a small fee to place a bid, usually \$1, and each bid increases the price of the auctioned item by small incre-ments, usually \$0.01. Each bid also resets the countdown timer to a preset time. The last bidder showing when the countdown reaches zero wins the auction -- usually at a very low price.

### About BidOnCash

BidOnCash is an exciting cash auction concept in which the bidding on every cash prize starts at \$0.00 with no reserve and each bid increases the selling price by only one cent. Because there is a fee for each bid placed, whether it wins the auction or not, BidOnCash is able to auction cash prizes at a fraction of their dollar value. Read how BidOnCash works [here](#). BidOnCash is owned and operated by Soluan Group, a young, innovative and entrepreneurial organization based in Cyprus, and managed with integrity by individuals possessing many years of experience in various online and entertainment businesses.
