## Pipeline Healthcare Extends Service to 19 U.S. States

*Pipeline Healthcare develops and delivers world-class telepharmacy solutions. We are proud to announce coverage in 19 U.S. states.*

San Francisco, CA ([prHWY.com](http://prHWY.com)) May 27, 2010 - [Pipeline Healthcare](http://www.pipelinehealthcare.com) develops and delivers world-class telepharmacy services to North American hospitals and retail pharmacies. With an expert team of licensed remote pharmacists, PipelineRx can fill any service gap 24 hours a day 365 days a year so health-care providers can save money and enhance patient care and medication safety. Pipeline Healthcare is proud to announce that its remote order entry and verification service has been extended to 19 U.S. states, with many more areas coming soon. Pipeline now has extensive networks developed on the West Coast, the Northeast, the Southeast, and the Midwest.

Pipeline Healthcare can extend a pharmacy's capabilities to help provide seamless continuity of care for patients, whether it's providing remote order entry and medication verification to cover night shifts, to cover vacations and sick leave for regular employees, or to help a pharmacy expand into new locations. Telepharmacy typically reduces costs by one third, and studies have found considerable improvements in quality and reduction of medication errors in both urban and rural healthcare facilities. Analogous to the advent of teleradiology, telepharmacy allows for faster prescription processing and enhanced quality care at a lower cost.
