
For immediate release June, 2010, Prose Inc. of Bonner Springs, Kansas announces its new Refurbish, Recycle, Reuse, Reduce campaign

Prose Inc's new web site <http://www.prosinc.com> was written in part to emphasize their new going green policy of reuse and refurbish. Prose offers an alternative that "recycles" existing furniture by restoring it to its original luster.

Bonner Springs, KS (prHWY.com) June 1, 2010 - **Prose Inc's new web site <http://www.prosinc.com> was written in part to emphasize their new going green policy of reuse and refurbish.** Prose refurbished, pre-owned "as is" and used furniture can be thought of as "recycled" office furniture. Instead of old furniture being discarded in landfills, and excess energy being used to create new furniture from ever more limited natural resources, Prose offers an alternative that "recycles" existing furniture by restoring it to its original luster. By restoring the furniture you are saving trees and various products that are used to make new furniture. Prose in essence gives nature a second chance and a new life by recycling and refinishing the original furniture. Prose can provide loaner furniture while the refurbishing process is being completed, to make the process as simple and easy as possible. Another benefit to the end user is that the cost of refurbished furniture is usually far more cost effective than buying new imported furniture from countries that may not value the environment as we do here in our country.

The Reuse/Refinish process begins with original top quality used furniture products, then Prose removes the outer shell or covering that may have become worn, stained or simply outdated and applies new fresh paint, fabric and laminate to give it a "like new" appearance.

*** Furniture Refinishing/ Refurbishing includes:**

- o Sanding
- o Laminate
- o Panel Fabric
- o Painting
- o Repair
- o Upholstery
- o Wood Refinishing
