
Proxy1Media.com was Great Help when I needed it the most!!

I I was referred to Proxy1Media from a Happy Client and close friend of the family. I had met David over the phone and since day one he was very helpful with creating our new business here in South Florida.

Boca Raton, FL (prHWY.com) January 7, 2011 - We are a Hot Rod / Rat Rod Performance & Modification Company with over 25 yrs of New England business that had just relocated. We had been burned before by "website & internet marketing" people making tons of promises and NOT delivering. **From the get-go there was something about David that I believed in. He knew his website terms, he had samples to show us, he gave me more info than I ever wanted to know about how Google and the other "200+" search engines work.** With our relocation we went with a local auto wrap company and Proxy1media.com took our auto wrap design and transferred it over to our website, so we now have better branding consistency (something David was adamant about). The process took longer than we expected, because Proxy1Media had to wait until our auto wrap company finished and delivered files, but David and his team at Proxy1Media were there for us 100%.

My big thing is getting my money's worth and having a person/manager/owner answer the phone. This was 100% the case - David even gave me his cell phone number because he knew we have odd hours working in the performance industry and were not always available.

End of day - they performed; we got way more than we paid for and I think - he even gave us some free Google Marketing... I am still learning.. Vince from Long Island Performance
