

Ottawa Residents Enjoy the Benefits of a Family Dentist for Emergencies and Other Work

Having a family dentist in Ottawa who can help with emergency treatment can bring much needed relief. There are many other benefits to having a dentist who can treat the whole family, from young kids to grandparents, to keep teeth healthy and looking

Ottawa, Canada (prHWY.com) March 17, 2013 - Ottawa, Ontario - Ottawa families in need of [general dentistry](#) are discovering the benefits of seeing a family dentist. Family dentists see patients of all ages so it's easy for the whole family, from the youngest to the young at heart, to maintain their oral health.

"Family dentistry practices allow the dentist to get an understanding of the genetics of everyone in the household and their overall dental IQ," says Dr. Pamela Li, whose Ottawa practice serves all of a family's needs, including [smile makeovers](#). "Genetics help me understand if a patient might have a higher risk for tooth decay or periodontal disease.

Then we can begin education and preventative treatment before problems or an emergency occur." [Ottawa cosmetic dentists](#) may be able to make predictions about a child's teeth, because they are familiar with their parents' teeth. If the doctor can determine how a child's teeth might come in, they can then offer early interceptive orthodontics to ensure the child has the best smile possible.

A family dentist can build a rapport with the entire family, and is well equipped to deal with children who may be apprehensive about having their teeth cleaned. Parents and children are seen at the same office, so appointments can be made together. That means parents can be with their children during the appointments.

The greatest benefit of seeing a family dentist, however, is the range of services they can offer. They can provide regular cleaning and maintenance, as well as orthodontic treatment, cosmetic dentistry and other procedures, such as Dental Bridge ,Tooth Whitening or [Teeth Bleaching in Ottawa](#).

"The services I can provide allow patients the ease of only having to visit one office," says Li. "I provide prenatal and geriatric dentistry, as well as help for sleep apnea and TMJ disorder." Establishing a relationship with a family dentist allows patients to create a connection that can extend from childhood into adulthood. The dentist and patient can get to know one another and establish a rapport that puts both at ease. Family dentists not only save patients time and provide a host of services, they'll become like an extended member of the patient's family.
